

## EASY ELEGANT CASHING.

Intuitive POS systems from the market leader Vectron.

### POS SYSTEM POS S14

#### MODERN, PROPRIETARY POS SYSTEM

Whether in boutiques and retail shops, hairdresser's shops or restaurants and cafés: The discreet design and the compact dimensions make the POS S14 the perfect solution for almost any ambience. The compact, capacitive touch screen is extremely scratchproof and resistant.

Thanks to the 14.1" display diagonal numerous functions can be displayed without scrolling, which makes the operation of the POS system convenient and efficient. The strong processor guarantees that POS data is quickly processed and displayed. A POS doesn't get any easier than this.

## HIGHLIGHT POS FUNCTIONS FOR THE CATERING TRADE

### MOBILE CASHING

The S14 can easily be combined with the Duratec MobileApp.

Save time and walking distance with our POS app to take payments on mobile devices. Available for mobile iOS and Android devices.

### CASH UP FOR GROUPS SEPARATELY

The split function divides orders quickly between individual guests. Time-consuming, error-prone divisions are a thing of the past.

The POS system is correct, the guests are happy and your staff are under less stress.

### CLEVER COURSE CONTROL

Cold soup, warm ice cream? You know what needs to be organised and communicated so that the right dishes come to the table in the correct order. Our POS system facilitates your life.

### TIME AND ATTENDANCE MODULE

Beside the normal EPoS functions the S14 offers time and attendance module. Your staff can easily sign in and out. Working times are kept and can be corrected. The detailed time and attendance report of the EPoS serves as solid basis for your payroll accounting.

### MORE SALES WITH SERVICE REMINDERS

EPoS systems warn when nothing has been ordered for a check for a specified period. Your staff are then reminded to actively ask if the guest would like anything else. Sales are increased as the satisfaction of the guests, who feel looked after and respected.

### OPTIONAL MARKETING MODULE FOR CUSTOMER LOYALTY

Customer, gift and payment cards: Handle campaigns (e. g. discount, coupon and stamp campaigns) directly via the POS system. Reservation system: Give your customers the opportunity to conveniently reserve services online. Around the clock - with automatic confirmation.
