DURATEC

System concept

The Duratec MobileApp completes stationary Duratec POS systems by professional options for mobile order taking, guest check administration and invoicing in the hospitality trade.

To guarantee fast and intuitive procedures, the operation of the Duratec MobileApp follows that of stationary Duratec POS systems. PLUs are selected via main groups and departments. The Duratec MobileApp comprises an informative GC overview and supports discounts as well as cash-, credit- and EC-card payment.

The demo mode, which for training purposes can be used without connection to a stationary Duratec POS system, already includes the example layout of a menu. Application in the hospitality trade requires a network connection to a stationary Duratec POS system.

Features

Features of the Duratec MobileApp
Login to a Duratec POS system
Operator login / -logout
