

MOBILE POS APP FOR PROFESSIONALS.

Fail-safe offline solution, no cloud.

DURATEC MOBILE APP

BOOK SALES INTUITIVELY ON MOBILE DEVICES

Save time and walking distance with our POS app to book sales on mobile devices. Pressure is taken off your staff, guests are served more quickly and errors are reduced, as the orders are entered right at the table and sent directly to the kitchen or bar. More orders in a shorter time mean more sales and satisfied guests. The POS app offers all of the convenience that you need when using the POS system wirelessly, and has such a simple design that you will have complete control over all of the functions in just a few minutes.

The stationary POS system is there for more complex processes, which also acts as a server for the mobile systems. The mobile and stationary devices are networked and perfectly coordinated with each other. Your data is not in the cloud, but safely stored in the POS itself. Articles divided into departments and search functions help you to always keep track of everything.

KEY POS FUNCTIONS

INFORMATIVE TABLE OVERVIEW

With the Duratec MobileApp you always know which orders belong to which table, which tables are currently open and which member of the serving staff is responsible.

SPLIT BILLS / RECEIPTS FOR LARGE GROUPS WITH EASE

Using the split function you can quickly split Bills / Receipts between individual guests. Time-consuming, error-prone divisions are a thing of the past. The POS system is correct, the guests are happy and your staff are under less stress.

CLEVER COURSE CONTROL

Cold soup, warm ice-cream? You know what needs to be organised and communicated so that the right dishes come to the table in the correct order.

Our POS system facilitates your life.
